

MINOR IN ENVIRONMENTAL HORTICULTURE

A minor in Environmental Horticulture will serve to broaden the academic background of students seeking employment in interdisciplinary job markets associated with plant sciences or the art and science of environmental horticulture. A minor will allow students a maximum breadth and depth in the field while utilizing a limited number of requirements.

Learning Objectives

Students completing this program will be able to demonstrate discipline-specific knowledge of the science and skills needed in environmental horticulture, turfgrass management, landscape management, and landscape design and contracting.
