

CERTIFICATE IN SEED SCIENCE AND TECHNOLOGY

The Seed Science and Technology certificate offers a comprehensive overview of seed analysis and a scientific understanding of seed biology.

Learning Objectives

Students will:

1. Identify plant species by seed structure and anatomy.
2. Demonstrate seed purity, germination, and viability testing procedures.
3. Analyze seed storage and seed deterioration processes.
4. Apply knowledge obtained in program to take the AOSA or SCST exams for their Certified Seed Analyst or Registered Seed Technologist credential.
