

DUAL DEGREE PROGRAM: MASTER OF BUSINESS ADMINISTRATION, IMPACT SPECIALIZATION COMBINED WITH MASTER OF FINANCE

The Impact MBA / Master of Finance Dual Degree prepares students to pursue careers in sustainable finance and the growing ESG space (Environmental, Social, Governance). By combining these two degrees, students are better prepared to enter the workforce in this new and growing sector.

The Master of Business Administration, Impact Specialization, is a 44-credit, 3 semester, full-time Resident Instruction program. The program aims to provide business solutions that achieve positive economic, environmental, and social impact. The program educates and prepares future business leaders to take effective roles in organizations that integrate economic, social, and environmental sustainability into core strategy and operations.

CSU's Master of Finance is a highly quantitative, 30-credit program offered on campus that provides a comprehensive study of the principles, processes, and practices of modern finance including investment analysis, portfolio management, financial management, and risk management. The program covers content required for the Chartered Finance Analyst (CFA®) and Financial Risk Manager (FRM®) exams and provides a good foundation for students who want to further their education beyond the master's program.

Both degree programs are designated as in a science, technology, engineering, and math (STEM) field. The STEM designation allows international students the opportunity to receive a visa extension after they have completed their degree.

With the dual degree, in just 2 years, students can complete the 59 required credits (15 of which are shared between the two programs), including a summer Corporate Sustainability Fellowship. The preferred path (but not the only option) is for students to complete the 3-semester Impact MBA requirements first, including some Master of Finance credits in the 3rd semester, and complete the remaining Master of Finance credits in their 4th semester.

- *Global Perspective:* Graduates acquire a global and cross-cultural perspective in formulating decisions and implementing organizational strategy.
- *Enterprise Approaches to Global Challenges.*

Graduates of the Impact MBA program develop the skills to:

1. Assess opportunities for enterprise approaches to address social and environmental challenges.
2. Develop, implement, and manage initiatives or enterprises that address global social and environmental challenges.

Master of Finance Program Learning Objectives:

- Describe the function and structure of securities markets and financial intermediaries in a global economic environment.
- Estimate the value and equilibrium rates of return to domestic and international equity and debt claims via models of cash flow and relative value.
- Describe and analyze the use of derivative instruments in managing risks to equity, debt, and currencies in domestic and international markets.
- Describe, estimate, and interpret statistical models of financial risk, returns, volatility, and firm value.
- Explain and demonstrate the concept of arbitrage in valuing firms, financial assets, and derivative instruments.

Students interested in graduate work should refer to the Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) or visit the department website (<https://biz.colostate.edu/academics/graduate-programs/>).

Impact MBA Program Learning Objectives:

- *Business Acumen and Integration Skills:* Graduates demonstrate competency across business functions and integrate them into strategic decisions.
- *Practical Leadership and Management Skills:* Graduates demonstrate individual, interpersonal, and organizational leadership skills necessary for professional development and organizational effectiveness.
- *Critical and Analytical Thinking:* Graduates apply critical thinking and analytical skills for management decision-making.
- *External Environment – Ethical, Legal and Regulatory Framework:* Graduates consider ethical, legal, and regulatory implications inherent in business situations and apply that knowledge to make responsible decisions.
