

MASTER OF EDUCATION IN EDUCATION AND HUMAN RESOURCE STUDIES, PLAN B, LEARNING DESIGN AND TRAINING SPECIALIZATION

The Learning Design and Training specialization is designed to prepare practitioners in planning, design, development and instructional responsibilities needed to teach learners in postsecondary, community, and corporate settings.

With coursework that is grounded in current adult learning theory and design and consistently connected to practice, this master's degree prepares graduates to successfully facilitate, design and implement a wide range of training and educational programs.

Students interested in graduate work should refer to the **Graduate and Professional Bulletin**.

Learning Objectives

1. To prepare professional learning facilitators to work and be recognized as expert-level practitioners in a variety of learning environments within a culturally diverse global context
2. To guide learners in becoming critically reflective practitioners capable of conducting and communicating workplace research as it relates to and informs their practice in the field of learning and teaching
3. To encourage individual and professional growth through exposure to other colleagues and collaborative and project-based learning environments.
