

MINOR IN ZOOLOGY

The minor in Zoology is a useful complement to a major in animal science, fishery biology, geology, natural resource recreation and tourism, or wildlife biology.

Learning Objectives

Students successfully completing the Zoology minor will:

1. Demonstrate a fundamental understanding of multiple aspects of biological concepts, processes, and phenomena relevant to animals;
2. Broaden their knowledge-base in biology and zoology, such that they will be able to integrate their knowledge of animal biology with their broader or complementary interests, e.g., their major field of study.
