

# MINOR IN DATA SCIENCE

---

Students with a minor in Data Science will receive foundational training in modern data science to complement and enhance their major field of study.

## Learning Objectives

Upon successful completion, students will be able to:

1. Determine the appropriate method to apply to a given data science problem.
2. Prepare data drawn from disparate sources in to a form suitable for analysis.
3. Perform basic data science analyses.
4. Interpret and present the results.
