

GRADUATE CERTIFICATE IN APPLIED GLOBAL STABILITY: WATER RESOURCES

The Graduate Certificate in Applied Global Stability: Water Resources is geared toward non-commissioned officers and company and field-grade officers in the Special Operations and Civil Affairs communities, as well as Department of Defense, USAID, Peace Corps, and other professionals working to address the United Nations Sustainable Development Goals. The certificate courses focus on global environmental sustainability and water resources. The certificate may be completed online or on campus and requires the completion of 12 credits. The certificate program is administered by CSU's Office of Defense Engagement (<https://www.research.colostate.edu/ode/>) through the School of Global Environmental Sustainability (<https://sustainability.colostate.edu/>).

Students interested in graduate work should refer to the Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) or visit the School of Global Environmental Sustainability (<https://sustainability.colostate.edu/>) website for further details.
